Take-down policy

If you believe that this document breaches copyright please contact us providing details, and we will remove access to the work immediately and investigate your claim.

Downloaded from the University of Groningen/UMCG research database (Pure): <http://www.rug.nl/research/portal>. For technical reasons the number of authors shown on this cover page is limited to 10 maximum.

Propositions

1. Optical coherence tomography angiography is a rapid, non-invasive method for imaging corneal vascularisation (Chapter 2).
2. Optical coherence tomography angiography may be useful in a variety of clinical applications to monitor cornea vessels in various inflammatory conditions (Chapter 3).
3. In the imaging of corneal vessels, optical coherence tomography angiography is comparable to the current gold standard of the invasive indocyanine green angiography (Chapter 4).
4. Serial imaging of corneal vessels using optical coherence tomography angiography is able to monitor changes in vessel density (Chapter 5).
5. Optical coherence tomography angiography is able to detect smaller corneal vessels compared to conventional slit-lamp photography (Chapter 6).
6. Various optical coherence tomography angiography systems for corneal vascularisation are not comparable when measuring parameters such as vessel density (Chapter 7).
7. *You cannot teach a man anything; you can only help him discover it in himself.*
8. *Imagination is more important than knowledge.*
9. *One, remember to look up at the stars and not down at your feet. Two, never give up work. Work gives you meaning and purpose and life is empty without it. Three, if you are lucky enough to find love, remember it is there and don't throw it away.*
10. *If I have seen further it is by standing on the shoulders of Giants.*
