Copyright

Other than for strictly personal use, it is not permitted to download or to forward/distribute the text or part of it without the consent of the author(s) and/or copyright holder(s), unless the work is under an open content license (like Creative Commons).

The publication may also be distributed here under the terms of Article 25fa of the Dutch Copyright Act, indicated by the "Taverne" license. More information can be found on the University of Groningen website: <https://www.rug.nl/library/open-access/self-archiving-pure/taverne-amendment>.

Take-down policy

If you believe that this document breaches copyright please contact us providing details, and we will remove access to the work immediately and investigate your claim.

Downloaded from the University of Groningen/UMCG research database (Pure): <http://www.rug.nl/research/portal>. For technical reasons the number of authors shown on this cover page is limited to 10 maximum.

Stellingen

- Cold-water corals do not need scale-dependent feedbacks or spatial patterns to survive.
- We should grade students with a pass or fail.
- Students should set their own learning goals and be involved in their own assessment.
- Peer review should be non-anonymous from both sides.
- Universities and research institutes should host their own journal where scientists affiliated to the institute can publish for free.
- Scientists funded with public money have an obligation to facilitate that their knowledge can be used outside of the scientific community.
