Social Factors and Alzheimer's Disease: Navigating this Two-Way Street using Mouse Models

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. J.M.A. Scherpen
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on
Monday 22 January 2024 at 12.45 hours

by

Suzanne Diane Lanooij

born on 17 September 1994
in Woerden

Supervisors

Prof. M.J.H. Kas

Prof. E.A. van der Zee

Prof. U.L.M. Eisel

Assessment Committee

Prof. G. Van Dijk

Prof. P.P. de Deyn

Prof. E.M. Hol

Content

Chapter 1	<i>General introduction:</i> Influencing cognitive performance via social interactions: a novel therapeutic approach based on neuroanatomical mapping?	7
	<i>Thesis outline</i>	19
Chapter 2	Variation in group composition alters an early-stage social phenotype in hAPP-transgenic J20 mice	23
Chapter 3	The effects of social environment on AD-related pathology in hAPP-J20 and tau-P301L mice	51
Chapter 4	Social isolation mitigates limb clasping in female P301L mice which cannot be prevented by passive exercise	87
Chapter 5	Summary & General discussion	103
Appendix I	Longitudinal characterization of social and cognitive performance in female hAPP-J20 mice	119
Appendix II	The effects of social environment on behavior and blood inflammatory markers in tau-P301L mice	155
