The importance of infrarenal sealing zone assessment in endovascular aneurysm repair

**ISBN:** 978-94-6496-040-2

**Cover design:** Sieben Medical Art

**Lay-out:** Wendy Bour-van Telgen

**Printing:** Gildeprint

The clinical studies described in this thesis were supported by a grant of Stichting Lijf & Leven.

Financial support by “PrediSurge PlanOp®: Advanced AI-powered solutions for anticipating complications following endovascular procedures” for the publication of this thesis is gratefully acknowledged.

Financial support by the Dutch Heart Foundation for the publication of this thesis is gratefully acknowledged.

Further financial support for the publication of this thesis was provided by: University Medical Center Groningen, Graduate School of Medical Sciences, University Groningen Library, Stichting Lijf & Leven, Terumo Aortic, Pie Medical Imaging, Noord Negentig, ChipSoft, and “Brood, lekker en gezond”.

Prof. dr. J.P.P.M. de Vries and dr. R.C.L. Schuurmann are co-founders of Endovascular Diagnostics B.V., which holds patent rights over the apposition software.

## TABLE OF CONTENTS

<b>Chapter 1</b>	General introduction	8
<b>Part I</b>	<b>Defining the infrarenal sealing zone</b>	
<b>Chapter 2</b>	European expert opinion on infrarenal sealing zone definition and management in endovascular aortic repair patients: a Delphi consensus	22
<b>Chapter 3.1</b>	Invited commentary – Infrarenal aortic neck angulation falls short as a sole prognostic factor for EVAR outcomes	50
<b>Chapter 3.2</b>	Pre-operative aortic neck characteristics and post-operative sealing zone as predictors of type 1a endoleak and migration after endovascular aneurysm repair: a systematic review and meta-analysis	56
<b>Part II</b>	<b>Risk stratification for type 1a endoleak</b>	
<b>Chapter 4</b>	Shortest apposition length at the first postoperative computed tomography angiography identifies patients at risk for developing a late type 1a endoleak after endovascular aneurysm repair	100
<b>Chapter 5</b>	Diminishing endograft apposition during follow-up is an important indicator of late type 1a endoleak after endovascular aneurysm repair	120
<b>Part III</b>	<b>Assessment of a novel conformable endograft</b>	
<b>Chapter 6</b>	Single-center results of the Gore Excluder Conformable Endoprosthesis with active control system in endovascular aneurysm repair	142

<b>Chapter 7</b>	Geometric analysis of the Gore Excluder Conformable Endoprosthesis in the infrarenal aortic neck: 1-year results of the EXCeL registry	162
<b>Chapter 8</b>	Summary of findings General discussion and future perspectives	180
<b>APPENDICES</b>		
<b>APPENDIX I</b>	Nederlandse samenvatting	198
<b>APPENDIX II</b>	List of publications and presentations	206
<b>APPENDIX III</b>	Dankwoord	212
<b>APPENDIX IV</b>	Curriculum Vitae	220
