ACKNOWLEDGEMENT

Praise to Allah who is the Lord of the universe for giving me chance and strength to accomplish this PhD studies without significant obstacles.

This achievement would never be completed without help and support from many people. Therefore, I would like to express my gratitude in few pages of my thesis to those who have supported me to complete my PhD.

Special mention goes to my supervisor, **Professor Justin J. Ye**. You are truly a good leader yet very friendly person. I wholeheartedly thank you for the tremendous and affection in the process of my PhD study. You always want to discuss and listen to your student and then give them very insightful comments, suggestions, and continuous encouragement. Always be optimistic and hard work, those are something that I can learn from you. I always feel lucky to have you as my supervisor. You guided me to be an experimentalist, something that might be very hard for you and me as well since I was coming from theoretical background. Early-stage of my PhD was very hard time for me because I came to your lab with almost zero experimental skills but you were patience and kept giving me fruitful guidance. And at that moment, the lab was under construction yet you never hesitated to involve me into the lab technical project. At last but not least, you always give me room to improve myself and develop my self-confidence.

To my co-promoter, **Prof. Maria A. Loi**, thank you very much for your support during my PhD study. You allowed me to work in your cleanroom facility in the early time of my PhD. Your research group is always insightful for me and I believe it will be keep developing in the future.

Philippe, you are very good supervisor and nice person. You taught me a lot about experimental technique, which encouraged me to pursue PhD as experimentalist. Pak Rijal, I always respect you as

my mentor and a father figure in Fisika ITB. You not only taught me about physics but also about life, to be independent as a person and researcher. You always encourage and supporting me to pursue higher education. I apologize because of my stubbornness and sometimes not following your advice. You will always be my teacher for the rest of my life.

A special mention goes to my paranymphs: **Ali Syariati** and **Puhua Wan**, thanks for accepting to be my paranymphs and the defense preparations. Ali, you are my best friend in Groningen.
