Temptation and Restraint

The role of reward and punishment sensitivity in anorexia nervosa, obesity,
and unsuccessful dieting

Nienke Christina Jonker

The studies in this dissertation were funded by NWO: de Nederlandse Organisatie voor Wetenschappelijk onderzoek (NWO Research Talent grant 406.14.091). The funder had no role in the study design, nor in the collection, analysis, and interpretation of the data. Chapter 2 of this thesis is part of the Tracking Adolescents' Individual Lives Survey (TRAILS). Participating centers of TRAILS include various departments of the University Medical Center and University of Groningen, the Erasmus University Medical Center Rotterdam, the University of Utrecht, the Radboud Medical Center Nijmegen, and the Parnassia Bavo group, all in the Netherlands. TRAILS has been financially supported by various grants from the Netherlands Organization for Scientific Research (NWO), ZonMW, GB-MaGW, the Dutch Ministry of Justice, the European Science Foundation, BBMRI-NL, and the participating universities.
