Regulation of protein homeostasis in acute and chronic stress

Di Wu

The work described in this thesis was performed in:

Laboratory of Immunopathogenesis, College of Veterinary Medicine, Nanjing Agricultural University, Nanjing, China

Department of Biomedical Sciences of Cells and Systems (Previous Department of Cell Biology), University Medical Center Groningen, University of Groningen, Groningen, The Netherlands

The printing of this thesis was financially supported by

University of Groningen
University Medical Center Groningen (UMCG)

ISBN (printed version): 978-94-034-1964-0

ISBN (digital version): 978-94-034-1963-3

Regulation of protein homeostasis in acute and chronic stress

PhD thesis

to obtain the degree of PhD at the University of
Groningen on the authority of the Rector Magnificus
Prof. E. Sterken and in accordance with the decision
by the College of Deans.

This thesis will be defended in public on

23rd Sep., 2019 at 12:45

by

Di Wu

Born on 29th April, 1990
In JiangSu, China

Supervisors

Prof. Dr. H. H. Kampinga

Prof. Dr. Endong Bao

Co-supervisor

Dr. S. Bergink

Assessment Committee

Prof. Dr. Dineke Verbeek

Prof. Dr. Willem van Eden

Prof. F. M. Reggiori

Contents

Chapter 1

Introduction and aim..... 5

Chapter 2

Aspirin pretreatment reduced heat stress injury to chicken myocardial cells 35

Chapter 3

The N-terminus of HSPB7 drives its activity to suppress polyQ aggregation 49

Chapter 4

FOXO1 prevents polyQ aggregation by inhibiting protein synthesis in a STAU1 and DDX18 dependent manner 69

Chapter 5

Insulin-like growth factor 2 (IGF2) protects against HD through the extracellular disposal of protein aggregates..... 95

Chapter 6

General discussion and perspectives 141

Appendices 151

Samenvatting in het Nederlands..... 152

Summary in English..... 155

Acknowledgements..... 157

Curriculum Vitae 159

List of Publications 159
