Printing: Kompendiet, Göteborg, Sweden

The research described in this thesis was carried out within  
the framework of the research school GUIDE

# Contents

<b>Chapter 1</b>	1
Introduction	
<b>Chapter 2</b>	71
Characterization of human placental alkaline phosphatase by activity and protein assays, capillary electrophoresis and matrix-assisted laser desorption/ionization time-of-flight mass spectrometry	
<b>Chapter 3</b>	91
Potential of capillary electrophoresis for the monitoring of the stability of placental alkaline phosphatase	
<b>Chapter 4</b>	107
Feasibility of non-volatile buffers in capillary electrophoresis-electrospray ionization mass spectrometry of proteins	
<b>Chapter 5</b>	127
Investigations into the stabilization of drugs by sugar glasses: The influence of various high-pH buffers	
<b>Chapter 6</b>	149
Investigations into the stabilization of drugs by sugar glasses: Tablets prepared from stabilized alkaline phosphatase	
<b>Chapter 7</b>	169
Investigations into the stabilization of drugs by sugar glasses: Delivery of an inulin-stabilized alkaline phosphatase in the intestinal lumen via the oral route	
<b>Chapter 8</b>	187
Conclusions and perspectives	
<b>Samenvatting</b>	193
<b>Acknowledgements</b>	199
