lembaga pengelola dana pendidikan

The research presented in this thesis was performed in the research group of Macromolecular Chemistry and New Polymeric Materials of the Zernike Institute for Advanced Materials at the University of Groningen, The Netherlands. This work was financially supported by Indonesian Endowment Fund for Education.

Contents

General Introduction	1
1.1 Polymers and Renewable Resources	2
1.2 Biobased Furan Monomers	4
1.3 FDCA-based Polymers	7
1.4 Enzymatic Polymerization	11
1.4.1 Categories and Role of the Enzyme	12
1.4.2 Lipases	13
1.5 Mechanism of the Enzymatic Polycondensation – Targeted Polymers	17
1.5.1 Polyesters	18
1.5.2 Polyamides and Poly(ester amide)s	21
1.6 Scope and Outline of the Thesis	22
1.7 References	25
Enzymatic Synthesis of 2,5-Furandicarboxylic Acid-based Semi-aromatic Polyamides: Enzymatic Polymerization Kinetics, Effect of Diamine Chain Length and Thermal Properties	39
2.1 Introduction	40
2.2 Experimental Section	43
2.2.1 Materials	43
2.2.2 Procedure for N435-Catalyzed Polycondensation of DMFDCA and Various Aliphatic Diamines <i>via</i> an One-Stage Method in Toluene	44
2.2.3 Enzymatic Polymerization Kinetics Study: the N435-Catalyzed Polycondensation of DMFDCA and 1,8-ODA <i>via</i> the One-Stage Method in Toluene	47
2.2.4 Instrumental Methods	47
2.3 Results and Discussion	49
2.3.1 Enzymatic Polymerization Kinetics Study	49

2.3.2	N435-Catalyzed Polycondensation of DMFDCA and Various Aliphatic Diamines <i>via</i> an One-Stage Method in Toluene	56
2.3.3	Effect of Diamine Chain Length on Enzymatic Polymerization.	57
2.3.4	Enzymatic Approach <i>versus</i> Conventional Synthesis Approaches.	59
2.3.5	MALDI-ToF MS Analysis.....	62
2.3.6	Thermal Properties of the Obtained FDCA-Based Semi-Aromatic Polyamides	64
2.3.7	Comparison of the Thermal Properties: Enzymatic FDCA-Based Semi-Aromatic Polyamides versus FDCA-Based and TPA-Based Counterparts Produced via Conventional Synthesis Approaches.....	67
2.4	Conclusions	68
2.5	References	70

Enzymatic Polymerization of Dimethyl 2,5-Furandicarboxylate and Heteroatom Diamines 75

3.1	Introduction	76
3.2	Experimental Section	78
3.2.1	Materials	78
3.2.2	Procedure for the N435-catalyzed Solution Polymerization of DMFDCA with Various Heteroatom Diamines.	79
3.2.3	Procedure for the N435-Catalyzed Bulk Polymerization of DMFDCA with Various Heteroatom Diamines.	80
3.2.4	Instrumental Methods	81
3.3	Results and Discussion.....	83
3.3.1	N435-Catalyzed Polycondensation of DMFDCA and Various Heteroatom Diamines <i>via</i> Solution and Bulk Polymerization.....	83

3.3.2	Influence of Diamines on Enzymatic Polymerization.	85
3.3.3	Influence of the Enzymatic Polymerization Method on the Molecular weights and Isolation Yields....	87
3.3.4	Microstructures of the Obtained FDCA-based Heteroatom Polyamides.....	88
3.3.5	Crystallinity and Thermal Properties of the Obtained FDCA-based Heteroatom Polyamides.	91
3.4	Conclusions	94
3.5	References	96

**Furan-Based Copolyesters from Renewable Resources:
Enzymatic Synthesis and Properties 101**

4.1	Introduction	102
4.2	Experimental Section	104
4.2.1	Materials	104
4.2.2	General Synthetic Procedure for CALB-catalyzed Copolymerization with a Temperature Varied Two-stage Method.	104
4.2.3	Instrumental Methods	108
4.3	Results and Discussion.....	110
4.3.1	Synthesis and Structure Characterization	110
4.3.2	Influence of Aliphatic Linear Monomers on the Enzymatic Co-polymerization of the Furan-based Copolyesters.....	112
4.3.3	Effect of Monomer Feed Composition on Enzymatic Synthesis of the Furan-based Copolyesters.....	115
4.3.4	Thermal Properties of Furan-based Copolyesters.....	118
4.3.5	Crystallinity of Furan-based Copolyesters.....	121
4.4	Conclusions	122
4.5	References	124

On The Way to Greener Furanic-Aliphatic Poly(ester amide)s: Enzymatic Polymerization in Ionic Liquid	129
5.1 Introduction	130
5.2 Experimental Section	131
5.2.1 Materials	131
5.2.2 CALB-catalyzed Polycondensation of DMFDCA with Various Diamines and Diols.....	132
5.2.3 CALB-catalyzed Polycondensation of DMFDCA with Various Amino Alcohols.....	133
5.2.4 Analytics	135
5.3 Results and Discussion.....	136
5.3.1 Synthesis and Structural Characterization of Furanic-aliphatic Poly(ester amide)s (PEAFs)..	136
5.3.2 Influence of Linear Monomers on the Enzymatic Synthesis of the PEAFs	138
5.3.3 Influence of Different Solvents on the Enzymatic Synthesis of the PEAFs	140
5.3.4 Crystallinity and Thermal Analysis of the Obtained PEAFs	143
5.4 Conclusions	146
5.5 References	148
