Citation for published version (APA):

Ruiz Conde, M. D. E. (2005). *Modeling innovation diffusion patterns*. s.n.

Copyright

Other than for strictly personal use, it is not permitted to download or to forward/distribute the text or part of it without the consent of the author(s) and/or copyright holder(s), unless the work is under an open content license (like Creative Commons).

The publication may also be distributed here under the terms of Article 25fa of the Dutch Copyright Act, indicated by the "Taverne" license. More information can be found on the University of Groningen website: <https://www.rug.nl/library/open-access/self-archiving-pure/taverne-amendment>.

Take-down policy

If you believe that this document breaches copyright please contact us providing details, and we will remove access to the work immediately and investigate your claim.

Downloaded from the University of Groningen/UMCG research database (Pure): <http://www.rug.nl/research/portal>. For technical reasons the number of authors shown on this cover page is limited to 10 maximum.

Subject index

adopter.....	10	mathematical specifications	
adoption data.....	51	external influence.....	15, 107
aggregate demand models.....	8, 10	internal influence.....	15, 109
aggregation level in diffusion models		mixed influence.....	16, 112
aggregate-level diffusion model.....	9	imitators.....	2
individual-level diffusion model.....	9	innovators.....	2
intermediate-level diffusion model.....	10	inter-firm diffusion.....	153
Bass model.....	17	intra-firm diffusion.....	153
country effect.....	125	non-repeaters.....	13
current market.....	11	non-triers.....	12
diffusion model.....	7	rate of adoption.....	15, 17
estimation procedures.....	18	repeaters.....	13
diffusion process.....	1	time effect.....	125
effective potential market.....	11	triers.....	12
fundamental diffusion model.....	14	untapped market.....	11
conceptual assumptions.....	21		
on adoption per adopter			
(assumption 4).....	51, 122, 195-201		
on external and internal influence			
(assumption 3).....	37, 120, 121, 122,		
130-131, 156-159, 165-166, 195-201			
on innovation characteristics			
(assumption 7).....	70		
on isolation diffusion			
(assumption 6).....	63, 122, 195-201		
on marketing variables			
(assumption 9).....	73, 120, 122,		
130-131, 195-201			
on population			
(assumption 1).....	22, 121, 156-159,		
165-166			
on potential market			
(assumption 2).....	25, 120, 121,		
130-131, 156-159, 165-166			
on spatial diffusion			
(assumption 5).....	60		
on supply restrictions			
(assumption 8).....	72
