# On the Role of Dislocations in Fatigue Crack Initiation

S. Brinckmann

RIJKSUNIVERSITEIT GRONINGEN

# On the Role of Dislocations in Fatigue Crack Initiation

Proefschrift

ter verkrijging van het doctoraat in de  
Wiskunde en Natuurwetenschappen  
aan de Rijksuniversiteit Groningen  
op gezag van de  
Rector Magnificus, dr. F. Zwarts,  
in het openbaar te verdedigen op  
maandag 18 april 2005  
om 16.15 uur

door

**Steffen Brinckmann**

geboren op 30 juni 1974  
te Rostock

Promotor: Prof. dr. E. van der Giessen

Beoordelingscommissie: Prof. dr. J.Th.M. De Hosson  
Prof. dr. M.G.D. Geers  
Prof. dr. H. Vehoff

ISBN 90-367-2237-3

# On the Role of Dislocations in Fatigue Crack Initiation

Steffen Brinckmann

The work of S.Brinckmann is part of the research programme of the “Stichting voor Fundamenteel Onderzoek der Materie (FOM)” which is supported financially by the “Nederlandse Organisatie voor Wetenschappelijk Onderzoek (NWO)”.

The work is part of the research programme of the “Materials Science Centre (MSC)”, Groningen. The majority of the computational resources were provided by this programme.

*To the siblings:  
Agnes and Robert*

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Motivation . . . . .	1
1.2	Mechanics background . . . . .	2
1.3	Experimental observations & Definition of terms . . . . .	3
1.4	Existing dislocation models of fatigue initiation . . . . .	7
1.5	Outline of thesis . . . . .	10
<b>2</b>	<b>Dislocation dynamics</b>	<b>13</b>
2.1	Basic Model . . . . .	13
2.2	Results . . . . .	20
2.3	Extended constitutive rules . . . . .	34
2.4	Results . . . . .	36
2.5	Summary and Conclusion . . . . .	42
<b>3</b>	<b>Stress concentrations at the free surface due to dislocation structures</b>	<b>45</b>
3.1	Introduction . . . . .	45
3.2	Brown model . . . . .	46
3.3	Discrete dislocation calculation . . . . .	48
3.4	Analytical solution of the stress field of a dislocation arrangement representing a PSB . . . . .	53
3.5	Discrete Dislocation Dynamics results . . . . .	57
3.6	Summary and Conclusion . . . . .	62
<b>4</b>	<b>Elastic fields due to surface roughness</b>	<b>65</b>
4.1	Experimental observation of ex- and intrusions . . . . .	65
4.2	Representative surface step . . . . .	66
4.3	Application to dislocation model . . . . .	81

<b>5</b>	<b>Stress-strain curves</b>	<b>89</b>
5.1	Introduction . . . . .	89
5.2	Model for strain-controlled simulations . . . . .	90
5.3	Stress versus strain-controlled experiments . . . . .	92
5.4	Results for stress and strain-controlled simulations . . . . .	92
5.5	Influence of grain size and shape on the stress-strain curve . . . . .	95
<b>6</b>	<b>'QuoVaDis' model</b>	<b>99</b>
6.1	Introduction . . . . .	99
6.2	Cohesive surface theory . . . . .	100
6.3	Boundary value problem . . . . .	103
6.4	Problem formulation . . . . .	105
6.5	Results . . . . .	107
	<b>References</b>	<b>113</b>
	<b>Appendix: Image force of a dislocation in half-space</b>	<b>119</b>
	<b>Summary</b>	<b>123</b>
	<b>Samenvatting</b>	<b>127</b>
	<b>Acknowledgments</b>	<b>131</b>
