Acknowledgments

”Thanks a lot Erik.” I had a great time being in your group. Thank you for your supervision and your insight in science. Also, thank you for sharing your non-science-related ideas. And thank you for being there and having an open ear for all problems of life. Thank you for confidence and trust and your encouragement to go my own way.

Furthermore, I want to thank Prof. Jeff De Hosson of the University of Groningen, Prof. Marc Geers of the University of Eindhoven and Prof. Horst Vehoff of the University of Saarbrücken for being part of the Reading Committee and their inspiring comments about this thesis and their large interest in the project itself.

”Thank you” to all those who tried to teach/explain me things about dislocations and their behavior. Thank you Alan, Amine, Vikram, Daniel and Harko.

I want to thank FOM for their support, the chance to attend several conferences a year and extensive coaching. FOM is the best employer I met so far. So, if you want to do research, go and find a job with Erik and with FOM.

I want to acknowledge the commitment of my paranimfen Siete and Teun although being busy with the own promotion and his nerd-ship, respectively.

Thank you all members of the $\mu Me\chi$ group for electing me twice as ”Nerd”. The cultural diversity of the group always gave refreshing support. Special thanks to: Lucia for the joy she brought to the group, Cihan for his finger-pointing sharing of ideas about society, Daniel and Berk for their knowledge of Linux, Latex and whatsoever, Anja for teaching me German, Patrick for his open discussions about life, my Ukrainian roommates Serge and Yaroslav for their very distant friendship, Sabine for baking the ”Rolle”, Maarten for the trust of giving me the administrator password, Lawrence for teaching me Christmas carols, Sumit for lobbing me becoming elected as Nerd and Monika for all her questions. Harko thanks for those blue eyes. Also thank you Harry for cleaning my desk on Thursdays.

I want also to thank the members of the MK group for their help in finishing the ice cream. Special thanks here to: Onne for his help with the library, Siete for his calmness and quietness and for taking part in the circuit-training, Wouter for joining the circuit-group, Stefan for his enthusiasm for any sporting activity and Redmer for his enthusiasm of unlimited BBQ although or because of having a vegetarian girl friend. I want to thank Tomas for his knowledge of and interest in beer and Nuno for being Nuno.

And special thanks to for being such a good friend. (If you feel I forgot you, fill you name in at the dots.)

THANK YOU GUYS, IT WAS A VERYⁿ ($n \rightarrow \infty$) NICE TIME.

Steffen
